* * * * *

These collections are not a mixture of discarded varieties but contain many high priced varieties and some of our interesting seedlings plus some very good standard varieties. (In more than 20 varieties.)

No. 1: 100 large bulbs, 1" and up, price \$4.25 prepaid in U.S.A.

No. 2: 100 medium bulbs, 1/2" to 1", price \$3.25 prepaid in U.S.A.

These two collections, if labelled, would cost at least 50% more. 50 bulbs may be ordered at same rate.

No. 3: 100 bulbs, large size, in newer, higher priced varieties, price \$6.75 prepaid in U.S.A.

No. 4: 100 bulbs, same as collection #3, but in medium size, price \$4.25.

These two collections are the best value you can get at these prices. 50 at same rate. Liberal allowance of extras.

GLADIOLUS SEED--This season we saved only seed from spikes in our test garden--all are open pollinated--and all are from new varieties introduced in the past three years. Most are from 1948 or 1949 introductions or from trial seedlings grown for test. No record of parentage was kept--but all seed when picked was thrown into one grand mixture. (Packet of 100 seeds, 25¢)

GLADIOLUS SEEDLING BULBLETS-- Last season we offered unbloomed seedling bulbs. The demand was so great that we had nothing left to plant for ourselves except those which were very small, nothing larger than $\frac{1}{4}$ inch in diameter. We were so amazed at the quality of their blooms that we will plant all of them back for a second year check from larger size bulbs. We expect to plant back all of their bulblets except those few that our customers may want. Since we grew 4000 different seedlings it is not probable that any two bulblets will come from the same parent bulb. After seeing those that bloomed, we think that this will be as good an investment in garden joy as you could make. We offer these bulblets at the following price: 15-25¢; 100-\$1.00.

* * * * *

Open package as soon as received. Examine your bulbs, and, if you are not ready to plant, store them in your vegetable cellar or a place where it is not too warm or too cold. All Glad bulbs must be dipped before planting in order to kill any thrips or disease that may be on them. We use Lysol: One and one-half tablespoonful per gallon of water. Soak bulbs three hours just before planting. Any water container will do. Do not plant near buildings, heavy rooted plants such as trees, etc. Spraying and dusting for thrip, we have used the two following formulas.

DDT Spray: 2 rounded teaspoonfuls DDT (50%) wettable, 1 teaspoonful Dreft; 2 gallons water, mix well and spray every week or ten days when foliage is about 8 or 10 inches high.

DDT Dust for thrip: 5% DDT dust and we use a roto dust gun. This is the quickest and easiest control. As effective as spraying but very much faster. We dust once in about every 10 days after foliage is 8 or 10 inches high. Do not use DDT dust on blooms as it will spot.

If you send us names of friends that grow Glads, with your orders, we will add extra bulbs as a reward.

These are State inspected bulbs. We try to and observe the fact that making friends is very essential to our business.

Sincerely yours,

HILLTOP FARMS, Morrison, Illinois
